THE ENDURING BEAUTY OF UNILOCK DRIVEWAY PAVERS

You’ve worked hard to make your home a comfortable retreat of beauty that expresses your individuality. A Unilock driveway is the exclamation point to the pride you feel every time you come home.

We’ve been helping homeowners create stunning outdoor living spaces and driveways for more than 40 years. As the leader in paver design and technology, Unilock is the premier choice for discerning homeowners. We’ve evolved over the years, now offering more exciting styles, EnduraColor Plus finishes for beauty that lasts and improved installation methods.

Let us help you increase the curb appeal and value of your home with a beautiful, long-lasting Unilock driveway.
BE ASSURED
LONG-LASTING PERFORMANCE

Unilock offers all the benefits of superior paver technology, but with enhancements that make it the premier choice of homeowners who expect exceptional performance.

NO SPALLING
Spalling describes a surface failure where the top layer of a product is shed, revealing an undesirable surface below. Unilock pavers offer strength up to four times that of poured in place concrete.

NO WEEDS
When a proper base is installed there is no soil directly beneath your pavers from which weeds can grow, and your paver driveway will stay even for decades. Weed seeds are prevented from falling in from above when joints are kept full with new, more rigid, jointing compounds.

NO SETTLING OR CRACKING
Pavers are designed to ‘flex’ with the seasonal freeze thaw cycles of a northern climate, a great advantage over other materials like concrete that can develop unsightly cracks over time.
Discoloration is a common complaint from owners of natural stone and decorative or stamped concrete driveways, but choosing the right paver can overcome this issue. Today, there’s a wide range of rich Unilock colors that last.

**New Technology, New Levels of Endurance**

We offer many finishes and processes that extend the performance of our pavers, from traditional Thrumix to wear-resistant EnduraColor to our exclusive EnduraColor Plus products that deliver styles and textures you can’t get anywhere else.

**ENDURACOLOR™**

**ENDURING COLOR**

Concentrated color and special wear-resistant materials

**UNITED WITH**

**STRENGTH**

Coarser foundation that gives the stone its strength
CONTROL WATER FLOW WITH PERMEABLE PAVERS

Traditional concrete and asphalt driveways are non-permeable, meaning that rainwater flows off the surface. This water is typically directed into storm water drains. However, in winter, water that remains on the surface of a non-permeable driveway will turn to ice, making the surface slippery. Town Hall and Thornbury are two of our leading pavers that offer permeable installation. Visit unilock.com to see the full line.

Channel Water into the Soil and Prevent Puddling and Ice Buildup

Permeable pavers look very similar to traditional pavers, but are made with extra space between them so rainwater can flow through the joints instead of running off the surface into storm sewers.

Water that flows between the pavers is absorbed into the native soil and helps feed vegetation around the driveway. And because water doesn’t puddle on the surface, less ice builds up in winter which means that less de-icing salt is required.
Unleash your imagination as you consider all the many Unilock styles, colors and patterns (more than 100 options). Unlike other driveway materials that require you to choose one style in a single color, the segmental nature of Unilock pavers means that you can easily combine complementary colors, shapes and styles to create a customized driveway.

Let our most popular styles ignite your creativity.
TRIBECA COBBLE
The rough surface texture of Tribeca Cobble gives it the appearance of natural granite cobble, and makes it a great choice for a casual, yet sophisticated, look. Several colors to choose from.
The unsurpassed strength and timeless beauty of Courtstone makes it the ultimate driveway paver. Cast from hundreds of real European cobblestones, Courtstone offers an old world look built for modern times. Six dynamic color options.
TOWN HALL

With up to four times the strength of poured in place concrete, Town Hall is exceptionally durable and offers a range of rich colors to choose from. Ideal for permeable or traditional installation.
THORNBURY
The modestly textured surface and random pattern of sizes give Thornbury a casual, natural stone look. It’s ideal for permeable or traditional installation and comes in a variety of colors.
If you’re looking for an elegant driveway paver, Richcliff is an excellent choice. It’s one of our most durable pavers, with an embossed surface for a naturally random appearance. Choose from three sophisticated colors combinations.
BEACON HILL

One of our most popular products for patios, Beacon Hill now has a size that’s appropriate for driveways. Choose from a wide range of color blends to find a perfect complement to your home.
ARTLINE
The long, clean lines of Artline reflect an emerging trend to minimalist, modern outdoor design. Choose a single color and finish, or mix and match them to create graphic interest.
UMBRIANO
The smooth, non-slip surface and granite-like finish of Umbriano give it a contemporary look. In addition, Umbriano offers EasyClean Stain resistance. Umbriano is available in a variety of colors.
6 TIPS FOR DESIGNING A DRIVEWAY

Considering installing a driveway? These tips will get you started on creating a driveway that expresses your design aesthetic and lasts for many trouble-free years.

> EXPLORE A FULL RANGE OF EXCITING DRIVEWAY DESIGN IDEAS BY VISITING OUR WEBSITE AT UNILOCK.COM/PHOTOS.

1. **CHOOSE A STYLE**
   Older style homes typically look best with traditional pavers or cobblestones with a historic feel.

2. **SELECT A COLOR**
   Consider borders and accents to draw out specific colors and create continuity.

3. **CHECK DIMENSIONS**
   For a double-car garage, plan a minimum of 20 feet.

4. **CONSIDER WALKWAYS**
   As a rule of thumb, walkways should be a minimum of four feet wide.

5. **THINK ABOUT ALL FOUR SEASONS**
   To reduce ice buildup, you may also consider permeable pavers.

6. **MAKE IT YOUR OWN**
   Get creative with your driveway to make it your own. With Unilock pavers, there are an unlimited number of design possibilities.
Service and support have always been a part of why Unilock is the industry leader. We stand behind our product like no other manufacturer. We introduced our transferable lifetime guarantee more than 30 years ago, guaranteeing that you’ll be satisfied with our products and their long-term performance. To download a copy of our fully transferable Lifetime Guarantee, visit Unilock.com.
NEED A PAVING CONTRACTOR? WE CAN HELP.

Unilock Authorized Contractors are part of an elite group whose work and business practices have met demanding standards. Unilock conducts on-site inspections of the contractor’s work and client satisfaction reference checks before a contractor is granted “Authorized” status, and these inspections continue annually. **Call 1-800-UNILOCK** or register online at **unilock.com** to connect with a Unilock Authorized Contractor who is guaranteed to do the job right.
