AWARDS  
OF EXCELLENCE  
BEST IN SHOW

# UNILOCK AWARDS OF EXCELLENCE BEST IN SHOW

At Unilock®, we believe the beauty of our products can only be fully realized through the outstanding design and installation skills of professional contractors. Because of this, we recognize and celebrate the best in design and installation with our annual Unilock Awards of Excellence competition. In place since 1994, the AOE is held at each Unilock location and showcases the best projects amongst hundreds of entries across various categories. For the past two years we have awarded a Best in Show prize to the most outstanding overall project, selected from all our regional winners across the U.S. and Canada.

**This year's Best in Show winner is Imagine Landscape from Everett, Ontario.**

They designed and installed this incredible Unilock pool surround, outdoor kitchen and entertainment space featuring Umbriano pavers and Rivercrest Wall.

## BEST IN SHOW

# LEARN

## LOOK BEYOND THE SURFACE

There's more to a successful project than simply what you see on the finished surface. The construction of the base, the technology that goes into the products you choose and the steps you take to care for your new outdoor space, all influence whether or not a project will continue to look great for years to come.

**CONSTRUCTION 101**  
**PRODUCT QUALITY**  
**CARE AND MAINTENANCE**

# CONSTRUCTION 101

The long-term performance of your project is determined by the **quality of the work** that's done to prepare the base **below** your pavers and walls.

A **proper base** will ensure that your pavers and walls **won't settle** or shift out of place with freeze-thaw cycles.

## EXCAVATION

The first step in any project is excavation of grass and topsoil.

The depth will depend on two factors:

- | **Soil Type** - Clay soil requires deeper excavation; sandy soil requires less.
- | **Use** - Heavy loads like driveways and retaining walls require deeper excavation; lighter loads like patios and walkways require less.

## GRAVEL BASE

The excavated area will be filled with a **base gravel**. This gravel base needs to be:

- | Strong enough to handle the load of whatever is placed on the surface.
- | Free draining so that water drains out of the base into the subsoil.
- | Extended at least six inches beyond the edges of the finished paver surface.
- | Compacted in several layers, using the proper equipment.

### BEDDING MATERIAL

The right bedding material installed at the right depth is vital to the performance of your pavement. It provides a nice smooth surface for laying pavers and allows water to quickly drain away from the surface.

### EDGE RESTRAINT

An edge restraint secured with long metal spikes will prevent the perimeter pavers from drifting away from the edge.

### JOINT MATERIAL

Joint material plays an important role in further locking the pavers in place, as well as keeping weeds and other debris out. There are several types of joint material to choose from. For more information on the various types, turn to page 64.

**REMEMBER** A quality project is built upon a solid foundation. For this reason, we recommend hiring a professional contractor.

For information on wall construction visit [unilock.com](http://unilock.com).

## PERMEABLE PROJECTS A GREENER CHOICE!

More and more homeowners are installing **PERMEABLE** paver projects to help direct rainfall away from storm sewer systems and back into the natural ecosystem. The pavers used in a permeable installation look very similar to traditional pavers, but are made with extra space between them so rainwater can flow back into the earth below, instead of running off the surface into storm sewers.

Special materials are used in the permeable base and joints to encourage water to flow through. Unilock® permeable paver choices can be found on pages 76 and 102-103.

**INTERESTING FACT** Some homeowners install rainwater collection systems underneath their paver projects to supply water to inground sprinkler systems!

# PAVER CONSTRUCTION

Brussels Block® - Tumbled Finish

## GOOD STANDARD THRU-MIX

This is how the first pavers were manufactured. The product mix of large and small aggregates is consistent, from top to bottom, with color mixed throughout. The Unilock® **Classic** pavers we manufacture exceed all ASTM standards for quality and strength. They're available in traditional paver shapes and a variety of textures including smooth, dimpled or tumbled. Find them, beginning on page 95.

## ENDURACOLOR™

### ENDURING COLOR

Concentrated color and special wear-resistant materials

### UNITED WITH

### STRENGTH

Coarser foundation that gives the stone its strength

Profile View

## BETTER FACEMIX

Facemix products are manufactured in a two-step process which combines a base of coarser aggregates for a stronger foundation, with concentrated color and wear-resistant finer aggregates on top. Facemix products are highly resistant to fading because the top layer prevents large, lighter color aggregates from showing through. This is the manufacturing process for Unilock EnduraColor products you'll find beginning on page 82.

## BEST ENDURACOLOR™ PLUS ARCHITECTURAL FINISHES

**Only Unilock offers EnduraColor™ Plus Architectural Finishes**, a collection of products that deliver long-lasting beauty through a proprietary blend of exclusive and superior ingredients. A complex blend of granite and quartz, some of nature's highest performing minerals, are combined to create ultra-realistic surface textures and unique style options that are exceptionally durable. Proprietary manufacturing technologies like Ultima™, EasyClean™, ColorFusion™ and Reala™ give these products added benefits in terms of beauty and function. You'll find these exclusive Unilock products beginning on page 68.

**A NEW STANDARD FOR EVERLASTING BEAUTY.**

The majority of the project budget is base materials and labor.

Choosing a premium paver or wall product **won't drastically impact** the overall project cost.

Upgrading to EnduraColor or EnduraColor Plus could have less impact on the overall project price than you may think. Don't settle for older technology without understanding what today's best products have to offer.

# PRODUCT QUALITY

Many products will look great when they're first installed, but in time, the difference in quality shows. **All products are NOT created equal!**

Installed with the proper construction methods, the longevity of your project relies on the **quality of the paver and wall** products you choose.

## COLOR

Deep, rich color choices and natural color blends are characteristics that make Unilock® products unique. Our synthetic iron oxide pigments are weatherproof, UV resistant and outperform natural counterparts.

## STRENGTH

The compressive strength of Unilock pavers and walls exceeds industry standards and ranges from 7,000 psi on small wall products, to more than 12,000 psi on some pavers.

## DIMENSIONAL TOLERANCE

Dimensional tolerance is something we pay close attention to because when pavers are consistent in size, they require less adjustment when installed. This can mean significant labor cost savings, and a speedier delivery of your finished project.

## DURABILITY

All Unilock pavers and walls are backed by our lifetime guarantee. They are slip-resistant and designed to tolerate oil and gas spills. As well, they're resistant to salt and chlorine erosion.

## PROPRIETARY UNILOCK TECHNOLOGIES

### EXTRA STRENGTH

#### Ultima™ Concrete Technology

A proprietary manufacturing process that creates pavers and walls with up to four times the strength of poured concrete. Find Unilock products featuring Ultima on pages 70-72, 74-79.

### THE LOOK OF GRANITE

#### ColorFusion™ Technology

A proprietary technology that disperses color randomly to achieve the look of natural granite. Find Unilock products featuring ColorFusion on page 68 and 114.

### NATURAL STONE TEXTURE

#### Reala™ Technology

Ultra realistic textures are cast from natural stone, brick and historic cobblestones. Find Unilock products featuring Reala on pages 70-79,110 and 118.

### STAIN RESISTANCE

#### EasyClean™ Stain Resistance

An integral surface protection that allows for easier cleanup of spills when they happen, before a stain can develop.

*There are two Clean Factors (CF\*) to choose from:*

CLEAN FACTORS (CF)	CF 90	CF 100
Pavers are pre-sealed at the factory	*	*
Enhanced resistance to weathering	*	*
Reduced dirt absorption	*	**
Stains from leaves, coffee, ketchup, mustard, wine and BBQ oils are easier to remove	*	**

Look for EasyClean in Umbriano® **CF 90** (page 68 and 114) and Senzo™ **CF 100** (page 73).

# HOW TO KEEP YOUR PROJECT LOOKING GREAT FOR DECADES.

## A SOLID FOUNDATION PREVENTS SETTLING

When the base of your project is properly constructed, water will not accumulate underneath and settling will not occur. See page 48 for more information on proper construction. **Need help finding a qualified contractor?** Call us at **1-800-UNILOCK** or register online at **Unilock.com** and we'll match you with a Unilock® Authorized Contractor in your area.

## TO SEAL OR NOT TO SEAL

Some homeowners choose to apply a sealer to their project surface when it's finished, to enhance the color of their pavers. Others choose to appreciate the color of the pavers as they are. Unilock pavers will be durable with or without a sealer. If you choose to seal you should plan to re-seal every three to five years.

## WEEDS CAN BE PREVENTED

When a proper base is installed, there is no soil directly beneath your pavers from which weeds can grow. However, if the joints are not kept full with jointing material, it is possible for dirt and weed seeds to blow in from the surrounding area and germinate in the joints.

**In the past** - a basic sand was the only jointing material available. Unless this sand was replenished regularly, rain would erode the sand, leaving joints vulnerable to weeds.

**Today** - new varieties of sand stabilizer compounds and polymeric jointing material are available which **relieve homeowners from this maintenance burden.** See page 64 for more information on jointing material choices.

## WINTER CARE

Paver projects offer a clear advantage over poured-in-place concrete when it comes to weathering the four seasons. Installed right, your paver project will be built to withstand freeze-thaw cycles, so unlike concrete, it will never crack. As well, Unilock pavers are **resistant to de-icing salt.** To avoid damaging the surface of finer paving stones, we recommend using a plastic bladed hand shovel or adding a plastic cover to the blades of snow removal machines.

When a proper base is installed, there is **no soil directly beneath** your pavers from which weeds can grow.

**INTERESTING FACT** A permeable paver will accumulate less ice because water will drain from the paver surface before it has time to freeze. For more information on permeable paving, see Page 49.

# THE CHOICE OF DESIGN PROFESSIONALS

The same Unilock products available to homeowners are relied on by architects, landscape architects and engineers, to create world class commercial spaces across North America.

100 Pier 4, Boston, Massachusetts Designer: Mikyoung Kim

Chinatown Library, Chicago, IL. Designer: Site Landscape Architecture and Urban Design

LEARN

# PLAN

## TURNING YOUR DREAM INTO REALITY

If you've never undertaken an outdoor landscaping project before, it can feel overwhelming. We're here to help. The pages in this section are designed to help you plan for a successful project:

**CHOOSING A CONTRACTOR**

**DESIGN CONSIDERATIONS**

**CHOOSING PRODUCTS**

**PROJECT MANAGEMENT TIPS**

# CHOOSING A CONTRACTOR

---

Choosing the right contractor for your project is the most **important decision** of all because even the best materials can be spoiled by poor installation and workmanship.

## RELEVANT EXPERIENCE

- How long has the contractor been installing pavers and walls?
- Has the contractor installed projects in the past with the features you're considering (e.g. a raised patio, retaining wall, fire feature, grill island or water feature)? If so, can they provide photos?

## WORKMANSHIP

Ideally, a contractor will provide you with the addresses of projects the company has completed in the past. When you visit the job, **pay attention to the details.**

- Ask to see projects that are more than two years old so you can see how the work holds up over time.
- Are the pavers laid in a way that minimizes awkward cuts?
- Check the curves of the project to be sure pavers are placed or cut in a way that minimizes large gaps.
- Has edge restraint been used and is it still in place?
- How long does the contractor guarantee the work?
- How many warranty claims has the company had in the past two years?

## SUB-CONTRACTING

Some contractors will hire other companies to perform parts of the work, like lighting and irrigation. Be sure to ask the contractor about these sub-contractors and how they will be managed.

### HAVING TROUBLE FINDING A CONTRACTOR?

Contact us at **1-800-UNILOCK** or register online at **Unilock.com** to take advantage of our Unilock® Authorized Contractor referral program. We'll take the time to understand your project, and will match you with a local contractor who is guaranteed to do the job right.

## BASE PREPARATION

The longevity of your project relies on proper base preparation (see page 48 for more information on Construction 101).

- What are the contractor's base preparation methods?
- What materials are used and why?
- Is there a standard procedure for base preparation or will the contractor assess your site's unique needs?

## TIMING

Some of the very best contractors book their schedules months in advance.

- Ask the contractor how far in advance they are booking projects and how long they think your project might take.
- What is the contractor's payment terms?
- Is an **upfront deposit** required to secure the timing of the project?

## DOCUMENTATION

- Does the contractor have the proper licensing for their work?
- Does the contractor have **liability insurance** and are employees covered by Workers Compensation?
- Will there be permits required for the job and if so, who is responsible to secure them?

## COMPATIBILITY

- Do you like this contractor?
- Can you easily communicate and understand each other?
- Is this someone you can trust?
- Ask if the person you're meeting will be on site throughout the project or if someone else in the company will be your day-to-day contact person.
- Contacting **references** can help you understand how the contractor operates throughout a project.

## DESIGN

A contractor's portfolio of prior work can give you a great sense of their design approach.

- Does the contractor offer a design service?
- Is there a cost for this?
- If a design service is offered, **is the design hand drawn or rendered in 3D?**
- Are the contractor's designs something you would like for your project?

Contacting **references** can help you understand how the contractor operates throughout a project.

# DESIGN CONSIDERATIONS

---

## OUTDOOR LIVING

### EXPAND YOUR HOME

A new outdoor living space can **add functional square footage** to your existing home by providing a new space to relax, dine and entertain. Consider first how you would like to use the space and then design it as an extension of your interior decorating style.

### OUTDOOR ROOMS

Distinct areas for **cooking, eating and relaxing** can be created, even in a small space, by changing the color or style of paver or by adding a contrasting paver border to define the different spaces. Using pavers to create an area rug can help visually ground furniture groupings. In a larger space, vertical elements like steps, low walls and pillars can be used to create the feeling of 'rooms'.

### SEAT WALLS

Outdoor furniture is often over-sized relative to indoor furniture so be sure to design your patio with these generous proportions in mind. For smaller spaces or families who like to entertain, **seat walls** are a great solution for creating extra places for people to sit without the need for bulky furniture.

### EXTEND THE SEASON

**Fire features** are growing in popularity because they add visual interest and warmth that makes the space more enjoyable to use in cooler weather. Building lighting into low walls, steps and pillars can also draw people outside in the evening, and add visual appeal from inside the home.

Be sure to choose a color that **won't absorb too much** heat from the summer sun.

## POOL DECKS

### SIZE MATTERS

When planning your pool deck **four feet is the minimum perimeter** around the pool for basic access. However, if you intend to use the pool deck as a patio for entertaining or sunbathing, consider a larger size and be sure to factor in the size of your outdoor furniture.

### SAFETY CONSIDERATIONS

The paver you choose to surround your pool deserves special consideration because you'll be **walking on it in your bare feet!** Be sure to choose a color that **won't absorb too much heat** from the summer sun. A smoother surface is pleasing to walk on, but make sure it's sufficiently **non-slip**. Umbriano® is our most popular choice for pool decks; see page 68 for more details. For the coping around the edge of the pool, **avoid products with abrasive edges**. A contrasting coping color or inset border is something to consider, as it helps define the pool edge. Likewise, appropriate lighting is an important safety consideration. Use lighting to illuminate your pool for night swimming and to **define pool edges** and steps for greater safety.

### AMPLIFY THE DRAMA

Even a standard pool shape can become a dramatic focal point for your outdoor space if you add vertical elements like **low walls, planter boxes and water features**. Likewise, an ordinary hot tub can be transformed into a dramatic visual feature by surrounding it with stone elements so that it appears custom built.

Town Hall

# DRIVEWAYS

## CURB APPEAL

A paver driveway is **an investment that adds instant curb appeal** and value to your home. When choosing a paver product it's generally a good idea to complement the main color of your home rather than to try to match it. Then, consider borders and accents to draw out specific colors from your home and create continuity. Consider adding vertical features like pillars, planters and decorative walls to further enhance the beauty of your driveway.

## PRACTICAL DESIGN

Be sure to consider how guests will get from your driveway to your front door. If your driveway abuts a wall, slope or garden, add an extra four feet to the width so that car doors can be comfortably opened for passengers to exit. If your winter season brings snow, consider where you will pile it. And be sure to choose a paver that can withstand de-icing salts (all Unilock® pavers do!).

## THINK GREEN

Permeable pavers **allow rainwater to flow between the joints** and through special base materials so that it can be absorbed into the subsoil below. This provides a dual "green" benefit; not only does it reduce the amount of water that flows into storm sewers but it also provides moisture to surrounding plant material. **Reduced puddling** on the driveway surface also means that there is **less ice build-up** in winter months. Look for Unilock permeable pavers on pages 76 and 102-103.

Natural Stone

Umbriano® paver with Rivercrest® Wall

# ENTRANCES

## WELCOME GUESTS

A great looking front entrance gives guests a warm welcome. Attractive steps that are wide enough to easily navigate, **low garden walls and planter boxes** to frame softscaping, and smartly placed lighting all contribute to a cozy feeling and will help smooth the transition from the street to your home. As a general rule, a walkway should never be less than four feet in width.

## A PLACE TO SIT

Even a modest front yard can usually accommodate a small courtyard seating space, where a morning coffee can be enjoyed or parents can observe their children playing with neighborhood friends.

# BORDERS AND BANDING

Like crown molding that is the finishing touch to a room, smartly planned borders and banding can elevate your project from good to great. Unilock® pioneered the idea of borders and banding in pavers and walls and we continue to have the most unique options to make your project stand out.

See pages 128 and 129 for more Unilock borders and banding ideas, or visit **Unilock.com** to experiment with our online Uvision® borders and banding tool.

# VISUALIZING YOUR PROJECT DESIGN

A detailed design requires a great deal of time and effort, so you can understand why many contractors charge for this service in advance.

TRADITIONALLY,  
LANDSCAPE DESIGNS  
WERE HAND DRAWN TO  
SCALE ON GRAPH PAPER.

While there are many contractors and designers who still prefer to draw by hand, more and more plans today are being created digitally and in 3D.

If you're having trouble imagining what your project will look like when it's complete, a 3D design can really help.

**HAVING TROUBLE FINDING A CONTRACTOR WHO CAN HELP VISUALIZE YOUR DESIGN? WE CAN HELP.**

Contact us at **1-800-UNILOCK** or register online at **Unilock.com** to take advantage of our Unilock® Authorized Contractor referral program. We'll take the time to understand your project, and will match you with a local contractor who offers a 3D design service and is guaranteed to do the job right.

*Completed Job*

# CHOOSING PRODUCTS

## PAVERS

The horizontal paved surface is typically the largest area of the project, so it makes sense to begin here.

**COLOR** - Co-ordinate or contrast with the color of your home.

**STYLE** - Use the architecture of your house as a starting point and determine whether you're looking for something traditional, modern, rustic or historic.

**FUNCTION** - A driveway paver needs to be thicker than a patio paver to hold the weight of a vehicle. A pool deck paver needs to be non-slip and cool to walk on in the heat of summer. A paver for an outdoor kitchen needs to be easy to clean. Make sure the paver you choose is right for your project.

## WALLS

**FUNCTION** - Only certain wall products can be used as retaining walls, and very large retaining walls require more specialized products. Seat walls need to be attractive from both sides, while one-sided products can be used to build a fireplace. Make sure the wall product you choose is right for your project. Your contractor can help.

**COLOR** - Co-ordinate or contrast with the color of the pavers you choose.

**STYLE** - Consider the style of the pavers you've chosen and determine whether you're looking for something traditional, modern, rustic or historic.

## JOINTING MATERIAL

There are three types of jointing materials to choose from. They vary in durability and cost. Visit [Unilock.com](http://Unilock.com) to see which materials are suited to the product you choose. Your contractor can also help you decide which type is right for your project.

**Basic Jointing Sand** - To reduce the frequency with which you need to replenish this sand, a joint stabilizing sealer is recommended.

**Polymeric Sand** - This is a special sand combined with a binding agent which stays in place longer than basic jointing sand. However, it's not right for every project and needs to be installed with care to prevent hazing on finer surfaces.

**Unilock® EasyPro™** - This is the ultimate joint compound for paving stones. It's a no-haze, epoxy resin product that is puncture resistant, permeable and eco-friendly (made with 60% renewable products). It's perfect for wide joints but not recommended for all applications.

**THE BEST WAY TO PREVENT WEED GROWTH IS TO ENSURE THAT JOINTS REMAIN FULL OF A SOLID JOINTING COMPOUND.**

**COLOR** - The color of the jointing material can make a big difference in the look of your finished project.

GREY SAND

# PROJECT MANAGEMENT TIPS

---

## 1 | BUDGET

If your project is large or budget is a concern, you may choose to ask your contractor to provide **good/better/best versions** of the project, perhaps a budget that phases your project into several stages or one that offers special features such as a fireplace or pergola as a separate add-on option. Some contractors can even offer **financing** so you don't have to pay for your project right away. Once you decide how you want to proceed, be sure to get a signed contract that reflects this agreed budget and the contractor's payment terms.

## 2 | TIMELINE

Be sure to tell your contractor if there are any times that workers cannot be on the site and whether there is a **deadline** by which the project absolutely must be completed. Rainy weather sometimes impacts the timing of projects, so be sure to understand what happens in the event of a delay.

## 3 | WAYS OF WORKING

Your contractor's crew will be on your property on a daily basis. Be sure to agree to **ground rules** before the project begins. What time will work begin and end each day? What is their daily clean up routine? Where will products and equipment be stored on the site? Will the team work weekends? Will they require access to your home or garage during the project?

## 4 | BEING NEIGHBORLY

It's generally a good idea to let your immediate neighbors know about your project in advance so they can prepare themselves for a bit of noise and dust. You may even consider a small token of thanks for their understanding; it could go a long way to making them more forgiving of any disruption your project may cause.

## 5 | COMMUNICATION

Throughout your project make sure you and your contractor have open lines of communication. Establish in advance **who to contact if you have concerns** and how often you'd like your contractor to provide you with updates. If you notice something that doesn't look right on your project, be sure to let your contractor know right away. If a correction needs to be made, it's better to make the change early on.

## 6 | CHANGES

Unfortunately, even the best managed projects occasionally run into unplanned circumstances or last minute design changes. Be sure to understand the contractor's procedure for handling these changes and how they will affect the final price of your project.

## 7 | PROJECT WRAP UP

Once you've done a final inspection of your completed project, if you're happy with the work, be sure to **recommend your contractor** to friends and neighbors. If you can, write a favorable online review. And don't forget to **register for your Unilock® product warranty at Unilock.com!**

Don't forget to **register** for your Unilock product warranty at **Unilock.com!**

Summer Wheat with Richcliff<sup>®</sup> XL (Dawn Mist)

# UMBRIANO<sup>®</sup>

The random dispersion of color and granite particles creates the beauty of Umbriano's unique mottled surface, which resembles the appearance of natural granite. Umbriano's non-slip, stain-resistant surface is an ideal selection for driveways, pool decks, patios, commercial plazas and offices.

**ENDURACOLOR<sup>™</sup>**  
**PLUS** ARCHITECTURAL FINISHES

**EASYSLEAK<sup>™</sup> STAIN RESISTANCE - CF 90**

An integral surface protection that allows for easier cleanup of spills when they happen, before a stain can develop.

**COLORFUSION<sup>™</sup> TECHNOLOGY**

A proprietary technology that disperses color randomly to achieve the look of natural granite.

**NOTE:** Umbriano 24" and Random Bundle pavers are not suitable for vehicular applications.

**SPECIAL ORDER SIZES:** Umbriano is also available in 36 x 36" (10cm), 18 x 36" (10cm) and 12 x 36" (10cm) by special order only.

# FIREPLACES

Unilock® pre-built fireplaces are available to ship immediately and can be installed in a day, so you're able to enjoy a warm fire right away. The units come complete with a stainless steel firebox, pipe and metal termination cap, and are factory made so the look is consistent with the photos shown. Your satisfaction is guaranteed by Unilock.

## VENTANA

The Ventana pre-built fireplace is constructed with Lineo™ Dimensional Stone (page 108).

## TUSCANY

The Tuscany pre-built fireplace is constructed from Brussels Dimensional Stone® (112 ) and Copthorne® (page 78) accents.

## MODA

The Moda pre-built fireplace is constructed from Lineo Dimensional Stone (page 108) and Series 3000® (page 80) accent.

## BELLA

The Bella pre-built fireplace is constructed from Rivercrest® Wall (page 110).

**LOOKING FOR SOMETHING DIFFERENT?** Speak to your contractor about using Unilock products to build a custom fireplace that's just right for your project.

*Units and colors may not be exactly as shown.*

# FIREPIT KITS

## RIVERCREST FIREPIT KIT

This firepit kit is built with the Rivercrest® Wall. See page 110 for color options.

### FIREPIT GRILL

Firepit grill is included and fits securely into the firepit.

## SUNSET FIREPIT KIT

This firepit kit uses Brussels Dimensional Stone®. See page 112 for color options.

ROUND

### FIREPIT GRILL

Firepit grill is included and fits securely into both the round or square firepit designs.

SQUARE

# FIRE FEATURES

## LINEO™ DIMENSIONAL STONE

The linear fire table above is built with Lineo Dimensional Stone (page 108).

## RIVERCREST™ WALL

This firepit feature is built with Rivercrest Wall (page 110) and Natural Stone coping (page 104).

## RIVERCREST WALL

This unique fire table is built using Rivercrest Wall (page 110) and LedgeStone™ coping (page 118).

## BRUSSELS DIMENSIONAL STONE™

This firepit feature is built with Brussels Dimensional Stone (page 112) and LedgeStone coping (page 118). The accent paver used is Copthorne® (page 78).

## LINEO™ DIMENSIONAL STONE

This contemporary firepit feature is built with Lineo Dimensional Stone (page 108) and LedgeStone coping (page 118).

**REMEMBER** To ensure a long lasting fire feature, direct exposure to extreme heat from an open flame should be avoided. Always construct fire features with a protective heat barrier such as a metal insert, refractory blocks or approved firebrick to prevent potential heat damage.

**LOOKING FOR SOMETHING DIFFERENT?** Speak to your contractor about using Unilock products to build a custom fire feature that's just right for your project.

# WATER FEATURES

## LINEO™ DIMENSIONAL STONE

The pool-side water feature shown above is built using Lineo Dimensional Stone (page 108) and Ledgestone™ coping (page 118). The accent paver used is also Lineo Dimensional Stone.

## BRUSSELS DIMENSIONAL STONE™

This water feature is built with Brussels Dimensional Stone (page 112) and Natural Stone coping (page 104). The accent paver is Town Hall™ (page 76).

## LINEO DIMENSIONAL STONE

This modern water feature is built with Lineo Dimensional Stone (page 108) and Natural Stone coping (page 104). The accent paver used is also Lineo Dimensional Stone.

## RIVERCREST™ WALL

This unique water feature is built using Rivercrest Wall (page 110) and Natural Stone coping (page 104).

**LOOKING FOR SOMETHING DIFFERENT?** Speak to your contractor about using Unilock products to build a custom water feature that's just right for your project.

# GRILL ISLANDS

## RIVERCREST™ WALL

This unique grill island is built using Rivercrest Wall (page 110).

## BRUSSELS DIMENSIONAL STONE™

The grill island shown here is built with Brussels Dimensional Stone (page 112) and LedgeStone™ coping (page 118). The accent paver used is Series 3000® (page 80).

## LINEO™ DIMENSIONAL STONE

This modern grill island is built using Lineo Dimensional Stone (page 108).

## RIVERCREST™ WALL

This custom grill island is built using Rivercrest Wall (page 110).

**LOOKING FOR SOMETHING DIFFERENT?** Speak to your contractor about using Unilock products to build a custom grill island that's just right for your project.

# PILLARS

## BRUSSELS DIMENSIONAL STONE™

This multi-level pillar, step and wall feature is built using Brussels Dimensional Stone (page 112) and Ledgestone™ coping and pillar cap (page 118). The accent paver used is Cophthorne® (page 78).

## BRUSSELS DIMENSIONAL STONE

This pillar is built with Brussels Dimensional Stone (page 112) and Ledgestone pillar cap (page 118) and Brussels Fullnose™ (page 119) coping. Series 3000® (page 80) accent.

## LINEO™ DIMENSIONAL STONE

This modern pillar is built with Lineo Dimensional Stone (page 108) and Ledgestone coping and pillar cap (page 118). The accent paver used is Series 3000 (page 80).

## RIVERCREST™ PILLAR UNIT

The pillar shown above is built using the Rivercrest® Wall Pillar System and the garden wall used is also Rivercrest Wall (page 110). The coping and pillar cap used are Natural Stone (page 104).

**LOOKING FOR SOMETHING DIFFERENT?** Speak to your contractor about using Unilock products to build a custom pillar that's just right for your project.

# Quality

## FOR US, IT'S PERSONAL

**O**ver 40 years ago, our founder stumbled upon a unique little European product called the Uni-Stone. Intrigued by the benefits of this revolutionary paving method, he decided to license the product and bring the concept to North America. He purchased a basic paver machine from Europe and hired a small staff to produce the stones.

Founder Ed Bryant - circa 1972

In those days, most sales of Unilock® were to large-scale commercial properties and streetscapes. Any lapse in quality would be costly and would jeopardize our owner's personal reputation. So quality was of paramount importance.

From these humble beginnings, through to the multinational company we are today, Unilock has remained a family-owned company that puts quality first. For us, it's not just a matter of dollars and cents, it's our personal reputation that's on the line. Our customers - Homeowners, Contractors, Landscape Designers and Architects, across North America - can rely on us to supply them with **quality product every time.**

### TRANSFERABLE LIFETIME GUARANTEE

We introduced the industry's first lifetime guarantee over 30 years ago. And while other manufacturers have tried to imitate it, you just have to see them side by side to get the difference. Theirs are padded with self-protecting fine print and stipulations. Ours is not. For us it's simple. We guarantee that you'll be satisfied with our products and their long-term performance.

*Visit [Unilock.com](http://Unilock.com) to download a copy of our fully transferable Lifetime Guarantee.*
