EDGE DETAILS

ROUNDED EDGE

RECOMMENDED SAND

Gator G2 MAXX Sand
- Setting time: 15 mins
- Sets above 32°F / 0°C
- Can be applied if rain is expected (min. 1 hr)
- Dust free and haze free
- Requires only one watering
- Four colours: Beige, Grey, Black and Ivory

Coverage:

<table>
<thead>
<tr>
<th>Colour</th>
<th>Narrow Joints</th>
<th>Wide Joints</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beige, Grey, Ivory</td>
<td>65-85 sqft</td>
<td>22-42 sqft</td>
</tr>
<tr>
<td>Black</td>
<td>58-76 sqft</td>
<td>20-38 sqft</td>
</tr>
</tbody>
</table>

RECOMMENDED SEALER

Gator Wet Cast Low Gloss + Colour Enhancer
- Acrylic based
- Low gloss finish
- Vibrant Colour Enhancer
- Reduces oil and dirt penetration
- Protects against corrosion of salt

Coverage:

<table>

</tr>
</thead>
<tbody>
<tr>
<td>3.78 L / 1 U.S. gal.</td>
<td>175 sqft</td>
</tr>
<tr>
<td>18.9 L / 5.28 U.S. gal.</td>
<td>875 sqft</td>
</tr>
</tbody>
</table>
TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:
• C140 for Absorption 5% avg - 7% max
• Compressive Strength > 7,200 PSI avg.
• C67 for Freeze-thaw Durability
• C418 for Abrasion Durability
• Dimensional Accuracy +/- 3 mm

Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

TECHNICAL ADVANTAGES

◆ ELEGANCE
Deep rich colours and unique textures

REALA™
Cast from historic street pavers

ULTIMA™
Up to 4x stronger than poured-in-place concrete

DRIVE FRIENDLY
Can handle vehicular loads

Notes: Sold in full bundles only on a refundable skid. All measurements are nominal. Important: A urethane rubber paver mat must be used to prevent scuffing. Contact your Unilock Territory Manager or call 1-800-UNILOCK for further information. *For custom options, please contact your Unilock Territory Manager.

APPLICATIONS

Pedestrian

Residential Vehicular

Commercial Vehicular

Borders and Accents

*Wall pairing suggestion- U-CARA® or Rivercrest® Wall

*Paver Maintenance Tips:

• Equip plow scrapers and blades with shoes or high-density plastic blades to reduce the risk of damaging paver joints and the surface
• Only apply min. amount of de-icing salts necessary to melt the snow and ice. Remove excess salt after ice melts
• Regular cleaning routine should include sweeping or blowing loose debris from the pavement surface, and less frequently, deep cleaning with cleaning products and/or water
• Unilock pavers do not require sealing, however, some people choose to do so for aesthetic purposes

*Things to know:

Efflorescence is a naturally occurring calcium salt that can sometimes appear on the surface of concrete and clay products. Efflorescence does not affect the structural integrity of concrete, it is a purely aesthetic issue that typically disappears with no further intervention after a season of rainfall. If desired, the process can be accelerated by washing the surface with an Efflorescence Remover.
