<td>2” / HR</td>
</tr>
</tbody>
</table>

*Joint Width is measured at the top of the paver. Void Space is calculated at the base of the paver. **Infiltration rate is based on testing done when first installed and is an approximate. Permeable spacers are available for use with extended range of Unilock products.

RECOMMENDED SAND

Gator Aqua Rock

- For Residential & Commercial applications
- For permeable paver joints
- Helps prevent erosion due to climatic conditions
- Use as bedding and jointing material
- Graded to meet ASTM No. 9 water rate
- Long term high infiltration performance
- 2,200 lb Supercrack available for large applications

Coverage:

<table>

<tr>
<td>2,200 lb. Super Sack</td>
<td>880-1100 sqft</td>
</tr>
</tbody>
</table>

(Based on 60mm paver.)
TECHNICAL INFORMATION
ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units
Conforms to:
• C140 for Absorption 5% avg - 7% max
• Compressive Strength > 7,200 PSI avg.
• C67 for Freeze-thaw Durability
• C418 for Abrasion Durability
• Dimensional Accuracy +/- 3 mm
Test results available upon request
Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

TECHNICAL ADVANTAGES
ENDURACOLOR
Refined surface and long-lasting colour

PERMEABLE
Can be installed to allow water to flow through

Notes: Sold in full bundles only and is produced and sold on a required, refundable skid. Custom finish and color options are available. Special order - lead time is required. Minimum quantities apply. *Weights vary depending on plant of manufacture & finish. Important: A urethane rubber paver mat must be used to prevent scuffing. For permeable installations, Unilock recommends using granite chips for joint filler. All measurements are nominal. Contact your Unilock Territory Manager or call 1-800-UNILOCK for further information. *For custom options, please contact your Unilock Territory Manager.

APPLICATIONS

- Permeable (Heavy Duty)
- Pedestrian
- Residential Vehicular
- Commercial Vehicular
- Borders and Accents

*Wall pairing suggestion- U-CARA® Wall -matching colour and finish

*Paver Maintenance Tips:
- Equip plow scrapers and blades with shoes or high-density plastic blades to reduce the risk of damaging paver joints and the surface
- Only apply min. amount of de-icing salts necessary to melt the snow and ice. Remove excess salt after ice melts
- Regular cleaning routine should include sweeping or blowing loose debris from the pavement surface, and less frequently, deep cleaning with cleaning products and/or water
- Unilock pavers do not require sealing, however, some people choose to do so for aesthetic purposes

*Things to know:
Efflorescence is a naturally occurring calcium salt that can sometimes appear on the surface of concrete and clay products. Efflorescence does not affect the structural integrity of concrete, it is a purely aesthetic issue that typically disappears with no further intervention after a season of rainfall. If desired, the process can be accelerated by washing the surface with an Efflorescence Remover.

For Permeable applications - it is recommended that the jointing material be regularly maintained, including vacuuming, cleaning and reapplying to keep infiltration at its maximum potential.
