APPLICATIONS

- **Pedestrian**
- **Residential Vehicular**
- **Commercial Vehicular (4 x 12 x 4” only)**
- **Borders and Accents**
- **Roof Decks**

*Wall pairing suggestion- U-CARA™ Wall or Lineo™ Dimensional Stone

**Paver Maintenance Tips:**

- Equip plow scrapers and blades with shoes or high-density plastic blades to reduce the risk of damaging paver joints and the surface
- Only apply min. amount of de-icing salts necessary to melt the snow and ice. Remove excess salt after ice melts
- Regular cleaning routine should include sweeping or blowing loose debris from the pavement surface, and less frequently, deep cleaning with cleaning products and/or water
- Unilock pavers do not require sealing, however, some people choose to do so for aesthetic purposes

**Things to know:**

Eflorescence is a naturally occurring calcium salt that can sometimes appear on the surface of concrete and clay products. Eflorescence does not affect the structural integrity of concrete, it is a purely aesthetic issue that typically disappears with no further intervention after a season of rainfall. If desired, the process can be accelerated by washing the surface with an Eflorescence Remover.
