APPLICATIONS

Pedestrian

Residential Vehicular (Random Bundle only)

Borders and Accents

*Wall pairing suggestion- Rivercrest Wall or Lineo™ Dimensional Stone

*Paver Maintenance Tips:
• Equip plow scrapers and blades with shoes or high-density plastic blades to reduce the risk of damaging paver joints and the surface
• Only apply min. amount of de-icing salts necessary to melt the snow and ice. Remove excess salt after ice melts
• Regular cleaning routine should include sweeping or blowing loose debris from the pavement surface, and less frequently, deep cleaning with cleaning products and/or water
• Unlock pavers do not require sealing, however, some people choose to do so for aesthetic purposes

*Things to know:
Efflorescence is a naturally occuring calcium salt that can sometimes appear on the surface of concrete and clay products. Efflorescence does not affect the structural integrity of concrete, it is a purely aesthetic issue that typically disappears with no further intervention after a season of rainfall. If desired, the process can be accelerated by washing the surface with an Efflorescence Remover.
