TRANSFORMING HARDSCAPES

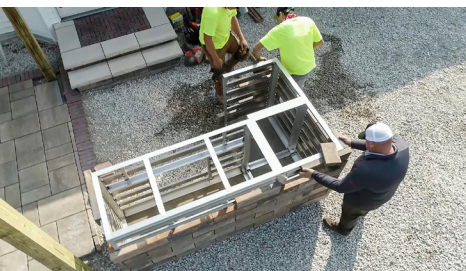

1-800-UNILOCK | UNILOCK.COM

U-Cara® has become the go-to hardscape wall product in North America.

The U-Cara® Multi Face Wall System allows you to build vertical hardscape elements easier and faster than is possible with traditional wall products.

U-Cara® has 3 unique structural systems: **Retaining Wall, Modular, and Wall Mount**, that all use U-Cara's patented hanging fascia panel feature. This provides outstanding design flexibility, allowing vertical elements to be built seamlessly throughout a design.

ALUMINUM FRAMED MODULES

Both labor and time saving, aluminum framed modules offer solutions for constructing many outdoor features, such as grill islands, counters and columns.

"After you put your first U-Cara vertical together you quickly realize you'll never go back to the old way of building them."

DESIGNER FASCIA PANELS

U-Cara's innovative hanging fascia panel is the ultimate design feature.

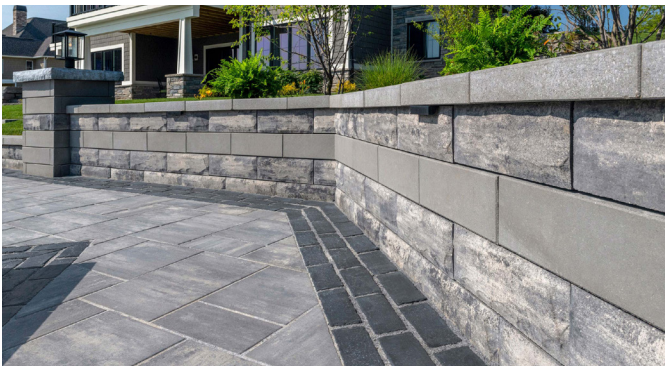

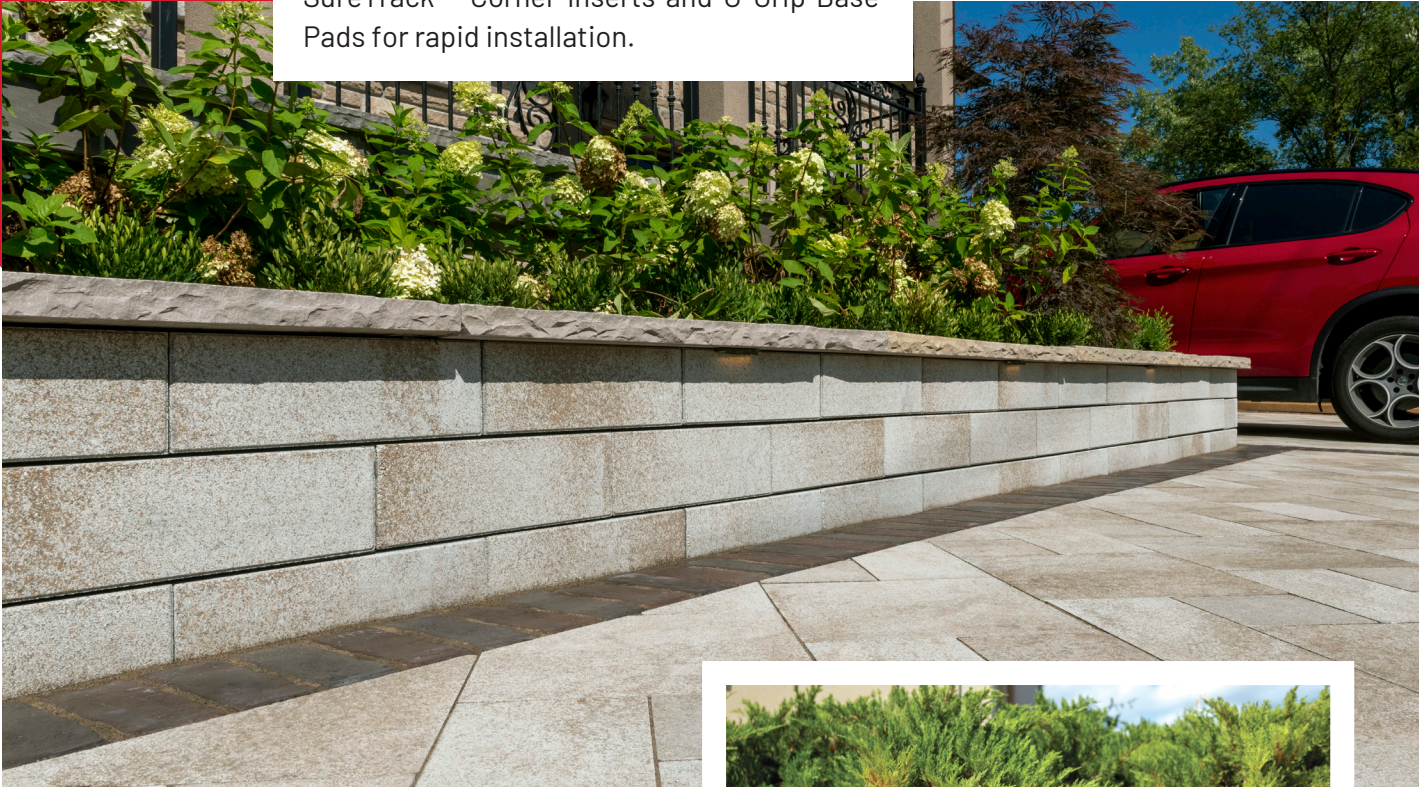

SURETRACK BACKER BLOCKS

Precision-molded, SureTrack™ Backer Blocks unit.

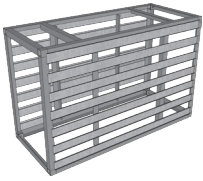

Retaining Wall System

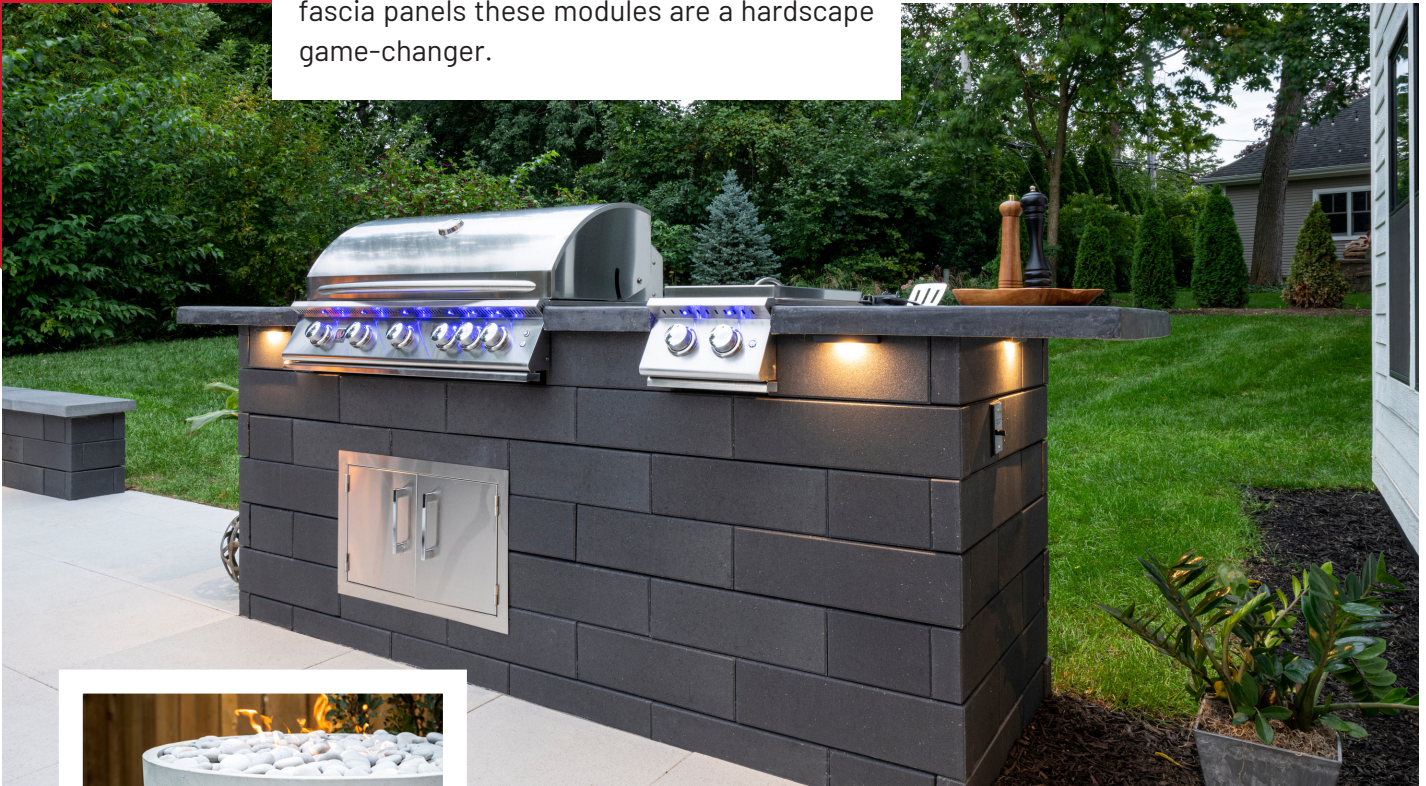

The U-Cara® Retaining Wall System is primarily made up of two main components, SureTrack™ Backer Blocks which construct the design element's structure and U-Cara Fascia Panels that create the look. The system also comes with corners units, accent fascias, innovative SureTrack™ Corner Inserts and U-Grip Base Pads for rapid installation.

Modular Wall System

The U-Cara® Modular Wall System is comprised of precision manufactured aluminum cabinets and panels which are used to rapidly build outdoor living features. Easy to transport, assemble and clad with U-Cara® fascia panels these modules are a hardscape game-changer.

Wall Mount System

The U-Cara® Wall Mount System can extend the landscape look and feel to any existing vertical structure or building within your project. Easily hang U-Cara® Fascia Panels to precision manufactured galvanized steel horizontal rails which can be fastened to concrete or wood substructures or surfaces.

U-Cara® Typical Wall Cross Sections

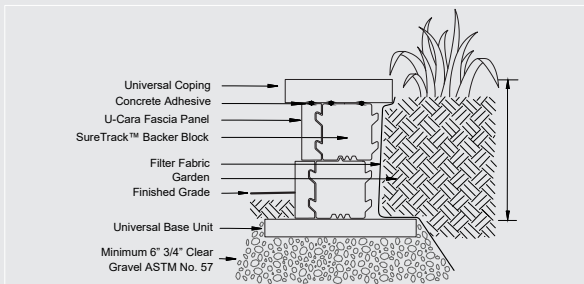

U-CARA RETAINING WALL GEOGRID SECTION

U-CARA® CROSS SECTION

REF: Detail_U-Cara_Garden_Wall

Garden Wall - Max Height 15'

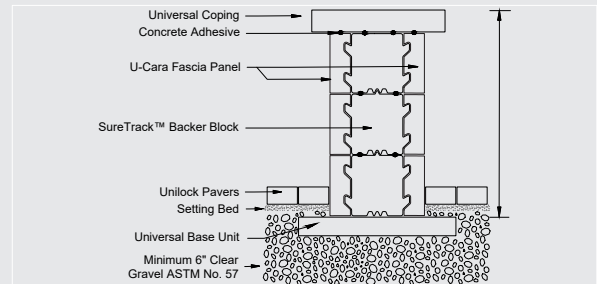

Notes:
This cross section is intended for preliminary design purposes only. Confirm site conditions and consult with a qualified design professional or installer prior to installation.

U-CARA® CROSS SECTION

REF: Detail_U-Cara_Seal_Wall

Seal Wall - Max Height 21'

Notes:
This cross section is intended for preliminary design purposes only. Confirm site conditions and consult with a qualified design professional or installer prior to installation.

All Cross Sections are available on Unilock's Contractor web site under products: contractor.unilock.com

Modular Wall System Components

The U-Cara Modular System offers a variety of aluminum frames that can be combined to construct vertical features such as grill islands, fireplaces and pillars - in hours, not days or weeks.

With the U-Cara Modular System you can build Grill Islands, Bars, Back splashes, Fire Places and Pillars.

Wall Mount System Components

The U-Cara Wall Mount System is an adaptation of the modular system. The structural component of this system consists of galvanized steel alignment bars and rails. This system allows the U-Cara fascia panels to be mounted directly to substrate materials such as plywood or concrete.

With the U-Cara Wall Mount System you can be used to clad building foundations and other freestanding structures.

What Our Customers Are Saying

Contractors across North America are loving U-Cara and the new fascia panel designs Subway, and Lavano.

Johnny Giovanni
STONE WORTHY

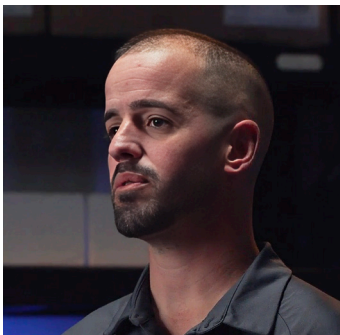

"What we like the best out of the U-Cara Multi Face System is that there is also blocks. For this particular job (featured on the cover of the 2023 Design Catalog) we used the blocks for the seat walls and the U-Cara Modular System for the fireplace and kitchen. For me to create a concrete mold for that fireplace it would have taken a lot longer. With U-Cara I was able to achieve the look and build I wanted to in a short amount of time. There's so much you can do with the U-Cara Systems!"

Chris Koiewicz
CLEARCUT LANDSCAPING

"I like working with U-Cara because you can use it for multiple aspects of the project - so there's a lot of flexibility in it.

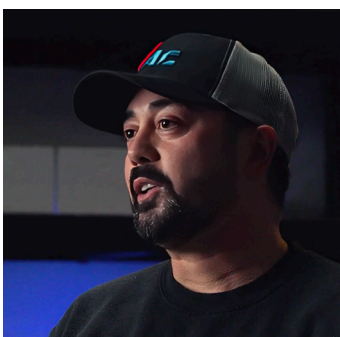

Two beautiful options we've got going on here. This one (Lavano) almost has that wood grain look to it. Constantly pushing the envelope - the texture! This one (Subway) almost going to give that 3D wall effect with the shades that you get in it. The design capabilities and applications for these walls are endless. Excited to implement them into the designs"

Daniel Pacheco
SCENIC STONE LANDSCAPE & DESIGN

"The potential to materialize virtually any design concept and color combination with the U-Cara Wall System became an exciting reality when we were first introduced to it.

I like it - they'll look great! This one (Subway) will be catering towards like a more modern design.

Rocco D-Angelo
NRX LANDSCAPING

"I like how easy U-Cara is to use. Once you establish your base plates, you start building on your structural blocks on top of that. So it's super customizable and you can really create a unique space with it.

A lot of the themes nowadays are like a modern linear design, this (Subway) will look sharp with that! For night lighting the shadows this will cast will look really pretty! There's another job we have were we're building some garden walls and I think this (Lavano) would really compliment all the softscaping. These new products will elevate any project."
