

UNILOCK®
DESIGNED TO CONNECT™

ARCHITECTURAL PAVEMENTS AND RETAINING WALLS

BRINGING YOUR VISION TO LIFE

Designed and installed in some of the most prestigious commercial spaces in North America, Architects, Landscape Architects and Engineers trust Unilock to bring their architectural vision to life and to withstand the toughest rigor of a commercial environment.

LANDSCAPE ARCHITECT: SmithGroup JJR

MICHIGAN STATE UNIVERSITY

College of Human Medicine • Grand Rapids Research Center

The building site was well under construction when the City of Grand Rapids decided to add an engaging public space at this corner. The challenge was to design a public gateway to the Monroe North district of downtown Grand Rapids, within a narrow window of time in order to make modifications to designed building and site components prior to their imminent construction.

The final design suggests a boardwalk, using plank pavers through a riparian area which includes rain gardens and infiltration basins. The intent was to evoke movement through the space, while embracing the relationship to the Grand River which is only a block away, and providing areas of respite for downtown visitors and employees.

To achieve the desired paving pattern, three colors of 6" x 24" Promenade™ Plank Paver were used: Winter Marvel, French Grey and Midnight Sky in the Umbriano® finish. This finish resembles natural granite with the proprietary ColorFusion™ technology and the built-in EasyClean™ helps to ensure the plaza is easier to maintain.

APPLICATIONS

COMMERCIAL RETAIL

In commercial environments, Unilock pavers and retaining walls offer a wide range of design solutions. Whether you are working with our standard product palette or taking advantage of our extensive custom capabilities, you will have the right products to bring your vision to life. Adding atmosphere, scale, flow and harmony, you will have the selection you need to meet your design objectives.

APPLICATIONS

PARKS & RECREATION

Seamlessly complement the beauty of gardens, fountains and other natural or man-made design elements, with the confidence that the paving material you select will stand up to the rigor of its environment. Unilock products offer advanced surface technologies that deliver a variety of benefits including stain resistance and easy cleaning properties. This makes them an ideal choice for high-traffic pedestrian areas.

APPLICATIONS

STREETSCAPES

Creating urban centers with visual appeal and style, while reflecting the character of the town or city, demands the right products to capture the spirit of the space. Our extensive range of exclusive textures, colors and sizes allow you to explore the design diversity required with products that will stand up to the application. High-traffic roads require heavy-duty paving and with Unilock, using the right unit paver can make a powerful impression.

APPLICATIONS

URBAN PLAZAS

For centuries, Europeans have been gathering in public squares for farmers markets, community events and entertainment. This tradition continues in modern day North America with citizens drawn to public spaces to relax or catch up with friends. The extensive collection of Unilock styles, colors and textures provides infinite design choices to reflect the surrounding environment and to bring a sense of community to any urban outdoor space.

APPLICATIONS

OFFICES

Successful commercial design incorporates elements which enhance a company's brand image and the building's architectural style. Linear patterns, color and texture are used to encourage flow and create stunning visual effects without compromising function. The wide range of Unilock sizes and styles allow you to create just the right look and feel.

PRODUCT: Promenade™ Plank Paver - Umbriano® finish Grenada White, French Grey and Midnight Sky

APPLICATIONS

MULTIFAMILY HOUSING

Inviting outdoor spaces are essential in every multifamily development. Using a variety of textures, colors and sizes, you can create spaces that are flexible, serving a full range of activities to encourage socialization yet offer solitude. Taking advantage of the site's exposure to sun, air and views, you can create a journey through the courtyard's social and private, open and secluded, active and passive spaces.

APPLICATIONS

ROOF DECKS

The opportunity to reclaim a functional space and turn it into an attractive destination has never been more timely. Unilock offers a full line of architectural roof deck pavers and slabs with the same great finishes used for on-grade applications. This makes it easier than ever to create harmony between the building's outdoor space and the site paving.

APPLICATIONS

HEAVY-DUTY & PARKING LOTS

For maximum performance where load capacity, truck and trailer (H-20 & HS-20) loading or everyday vehicular traffic are factors, Unilock can provide you with the right products. Heavy-duty pavers are available in traditional and permeable versions, in standard finishes as well as custom color and finish options to ensure that your design vision is achieved.

APPLICATIONS

PERMEABLE

Environmentally conscious product choices are more in demand than ever. Over the last 25 years, Unilock has developed an extensive collection of innovative products for environmental concerns such as stormwater management. Now rainwater harvesting and water quality concerns can be alleviated by designing in style with beautiful colors and textures, while promoting sustainability.

UNILOCK TECHNOLOGIES

Unilock is the **only company** in North America with memberships in Eurobeton and Stein + Design, two **prestigious European** concrete product innovation groups, which give us exclusive access to leading edge product designs and manufacturing processes.

UNILOCK QUALITY GUARANTEED

GOOD CLASSIC

This is how the first pavers were manufactured. The product mix of large and small aggregates is consistent, from top to bottom, with color mixed throughout. The Unilock **Classic** pavers we manufacture exceed all ASTM standards for quality and strength.

BETTER ENDURACOLOR™

EnduraColor products are manufactured in a two-step process which combines a base of coarser aggregates for a stronger foundation, with concentrated color and wear-resistant finer aggregates on top. EnduraColor products are highly resistant to fading because the top layer prevents large, lighter color aggregates from showing through.

THE BEST CHOICE.

ENDURACOLOR™
PLUS ARCHITECTURAL FINISHES

ONLY UNILOCK OFFERS ENDURACOLOR PLUS ARCHITECTURAL FINISHES.

These products set a new standard for everlasting beauty thanks to proprietary blends of some of nature's highest performing minerals such as granite and quartz, combined with manufacturing technologies that are exclusive to Unilock.

EXCLUSIVE UNILOCK TECHNOLOGIES

REALA™

Ultra-realistic textures cast from Natural Stone, brick and historic cobblestones.

Look for **REALA TECHNOLOGY**
in the following Unilock products:

COPTHORNE®, COURTSTONE®, RICHCLIFF®
RIVERCREST® AND TOWN HALL®

ULTIMA™

This proprietary manufacturing process creates pavers with up to four times the strength of poured concrete.

Look for **ULTIMA CONCRETE TECHNOLOGY**
in the following Unilock products:

COPTHORNE®, COURTSTONE®,
RICHCLIFF® AND TOWN HALL®

*Unilock
Town Hall
pavers are
built to last*

*Deteriorating
brick pavers
exposed to
deicing salt*

COLORFUSION™

A proprietary technology that disperses color randomly for a natural granite-like appearance.

Look for **COLORFUSION TECHNOLOGY** in the following Unilock products:

UMBRIANO®

EASYCLEAN™

Factory sealed to provide integral surface protection from stains.

Look for **EASYCLEAN STAIN RESISTANCE** in the following Unilock products:

SENZO™ AND UMBRIANO®

There are two Clean Factors (CF™) to choose from:

CLEAN FACTORS (CF)	CF 90	CF 100
Pavers are pre-sealed at the factory	*	*
Enhanced resistance to weathering	*	*
Reduced dirt absorption	*	**
Stains from leaves, coffee, ketchup, mustard, wine and BBQ oils are easier to remove	*	**

UNILOCK CUSTOMIZATION

Unilock allows you to **customize products** to suit your project. Our **vast array** of sizes, edges, finish and color options make it easy to achieve your design vision. Speak with your Unilock Representative about custom options available in your market.

UNILOCK PERMEABLE

Since Unilock **introduced permeable** pavers to North America more than twenty-five years ago, we have **steadily increased** our selection of sizes, shapes, colors and finishes. Our permeable unit pavers are self-aligning, with joint spacing that complies with the Americans with Disabilities Act.

ECO-PRIORA™

This versatile, customizable, permeable unit paver is designed with special spacer bars. The resulting 7mm gap is filled with a clear, fine stone chip that allows the rapid penetration of rainwater into the sub-base and subsoil.

DETAILS

JOINTING COMPOUND OPTIONS

POLYMERIC SAND

A special mix of graded sand and binder specifically formulated for achieving optimum lock-up of pavers and slabs.

EASY-PRO™

Pre-mixed and ready to use, no haze formulation, that can be applied during dry or wet weather.

For joint widths from ¼" (6.3mm) and depths from 1 ¼" (30mm).

UNILOCK FLEXIBLE EPOXY MORTAR - D1

Many times stronger than polymeric, this high strength, permeable, yet flexible, epoxy mortar is suitable for medium traffic loads up to 7.5 tons. It is easy to install, self-compacting and can be applied during dry or wet weather and does not require additional expansion joints. For joint widths from ¼" (6.3mm) and depths from 1 ¼" (30mm).

GRANITE CHIP

This high-strength crushed and washed granite meets ASTM No. 9 Stone Specifications for permeable joint filler. Available in a range of colors to work with your paving design.

JOINTING COLORS

Changing the jointing sand color can dramatically change the look and feel of the pavement surface. Various colors are available in traditional sands or polymer modified and epoxy modified compounds.

All sizes are nominal. Verify actual paver dimension to establish grid spacing.

PEDESTAL SYSTEMS

As an authorized distributor of Bison Innovative Products and Elmich Pedestals, Unilock can provide required pedestals and accessories. Contact your Unilock Representative for more information.

LEED® CREDIT OPPORTUNITIES

LEED, or Leadership in Energy & Environmental Design, is a green building certification program that recognizes best-in-class building strategies and practices that have a positive impact on the health of occupants, while promoting renewable, clean energy. To receive LEED certification, building projects satisfy prerequisites and earn points to achieve different levels of certification. Unilock products can help with your certification goals.

POTENTIAL LEED CREDITS FOR UTILIZING PERMEABLE PAVERS

RAINWATER MANAGEMENT: LEED V4

Up to three points can be achieved for retaining rainwater onsite based on the percentile kept. 85% (zero lot line projects only) • 3 points, 95% - 2 points and 98% - 3 points. (all except Healthcare - subtract one point)
See LEED v4 for more specific project/site details.

MATERIALS AND RESOURCES: LEED V4

Building Product Disclosure and Optimization - Sourcing of Raw Materials - Sourcing of Raw Materials and Extraction • 1 point
Building Product Disclosure and Optimization - Sourcing of Raw Materials - Leadership Extraction Practices • 1 point
Building Product Disclosure and Optimization - Material Ingredient Reporting- Material Ingredient Reporting • 1 point
Building Product Disclosure and Optimization - Material Ingredient Reporting - Material Ingredient Optimization • 1 point
Building Product Disclosure and Optimization - Environmental Product Declaration • 1 point

HEAT ISLAND REDUCTION - NON-ROOF: LEED V4

Paving materials with a three-year aged solar reflectance (SR) value of at least 0.28. If three-year aged value information is not available, use materials with an initial SR of at least 0.33 at installation OR use an open grid pavement at least 50% pervious • 2 points (except Healthcare - 1 point)
See LEED v4 for more specific site calculations.

SOLAR REFLECTANCE

Solar Reflectance Index (SRI) is a criterion used by USGBC that measures values of sunlight and radiation bouncing from built surfaces. It is used to measure urban heat island effects in city centers. Dark pavement absorbs heat during the day and then releases it at night. This process creates a situation that causes urban centers to stay warmer all the time which contributes to air pollution and increased energy consumption. Careful selection of materials and colors can help reduce urban heat island effects.

Values may change slightly by region due to variations in local aggregate. Please be sure to contact your Unilock Representative for a comprehensive and current list of SRI product values.

RECYCLED CONTENT

SUPPLEMENTARY CEMENTITIOUS MATERIALS (SCM)

Concrete is a mixture of sand, coarse aggregate, water and the principal cementitious material which is Portland cement. Today, most concrete recipes also contain supplementary cementitious material (SCM) admixtures. These can be by-products from other processes or natural materials that may or may not have been further processed for use in concrete. These materials may include Fly Ash (Class C or F), Ground Granulated Blast Furnace Slag (GGBFS), Silica Fume, Natural Pozzolans, recycled glass and more.

These admixtures can contribute toward achieving the cumulative minimum recycled content criteria for Leadership Extraction Practices.

Speak with your Unilock Representative about local SCM's available for custom orders.

PROJECT: Navy Pier, Chicago, Illinois

DESIGN: James Corner Field Operations

PRODUCT: Promenade™ Plank Paver - Series™ finish in custom colors

Navy Pier, the world's largest public pier was reimaged for its centennial with pier-wide enhancements designed to elevate its status as the top-attended leisure destination in the Midwest.

James Corner Field Operations worked closely with Unilock to create pavers that would help achieve SITES® certification. Using 30% copper slag as recycled content in the pavers created a stronger paver and when combined with local aggregate, an attractive 'salt and pepper' effect was achieved on the exposed aggregate finish. Subtle changes in the aggregate and pigment created four colors for the pier which will withstand this highly trafficked environment. The reimagining of Navy Pier has created a contemporary 'pierscape' with engaged social spaces that encourage movement, exploration, interaction and discovery.

APPLICATION BY SIZE, BY THICKNESS AND PRODUCT

Product	Product Size	Thickness	Pedestrian	Commercial Pedestrian*	Light-Duty Vehicular	Commercial Vehicular	Heavy-Duty	Permeable
<p>The aspect ratio of the paver unit (length / height = aspect ratio) directly correlates to the recommended usage.</p> <p>A ratio of 3:1 or less is recommended for Commercial and Heavy-Duty Vehicular applications,</p> <p>4:1 for Residential and Light-Duty Vehicular applications,</p> <p>and over 5:1 for Pedestrian only.</p> <p>Reference the chart as a guideline and contact your Unilock Representative for more information.</p>	36 x 36	10 cm	✓

All pavements require a site specific design.

A Herringbone laying pattern is essential for most vehicular trafficked pavements and becomes more critical as the demands on the pavements increase. Please contact your local Unilock Representative for specific design details. This chart is only a guideline.

* subject to occasional light duty service vehicles

** installed on a concrete base

UNILOCK RETAINING WALLS

A great retaining wall should provide an **aesthetic that blends** subtly with the environment and **surrounding architecture**. Segmental retaining walls have been the choice of Landscape Architects, Designers and Engineers who are looking for classic, clean lines and timeless appeal.

WALL AND STEPS

Granite Fusion pitched with Opal smooth accent and Universal Coping Pavers - Umbriano® (French Grey) with Town Hall® (Basalt) accent

FIRE FEATURE

Granite Fusion pitched with Universal Coping

GRILL ISLAND

Opal smooth with Granite Fusion pitched accent

Use U-Cara to build retaining walls, seat walls, pillars, planters, fire features, grill islands and more!

NEW FOR 2018 U-CARA™

The U-Cara Multi-Face Wall System represents a revolution in wall design.

This patented system, exclusive to Unilock, is comprised of two basic components:

- | Sure Track™ backer blocks provide dimensionally accurate structure
- | U-Cara fascia panels provide unlimited design options

SURE TRACK
STANDARD BACKER
5 7/8 x 7 7/8 x 5 7/8"
15 x 20 x 15cm

SURE TRACK
LARGE
5 7/8 x 6 7/8 x 11 3/4"
15 x 17.5 x 30cm

STANDARD FASCIA PANEL
5 7/8 x 18 3/8 x 2 3/8"
15 x 46.6 x 6cm

CORNER BUNDLE

STANDARD FASCIA HALF PANEL
5 7/8 x 9 3/16 x 2 3/8"
15 x 23.3 x 6cm

CLOSED-END FASCIA PANEL
5 7/8 x 20 7/8 x 2 3/8"
15 x 53 x 6cm

SURE TRACK CORNER INSERT
L = 2"
5cm

UNIVERSAL COPING
19 x 14 x 2 3/4"
48.2 x 35.5 x 7 cm

UNIVERSAL BASE UNIT
19 x 14 x 2"
48.2 x 35.5 x 5.5 cm

LOOK INSIDE!

U-Cara fascia panels hang easily on the patented **Sure Track** backer block.

U-Cara Fascia panels can be placed anywhere on the Sure Track™ Backer Block, allowing for a variety of patterns, color and texture combinations not possible with other systems.

LINEO™ DIMENSIONAL STONE

Contemporary and sleek lines define Lineo Dimensional Stone with a linear multi-length plank look. Ideal for garden walls, pillars and other outdoor vertical elements, Lineo Dimensional Stone offers up modern design and exceptional flexibility.

COLORS (Consult your regional Product Data Resource Guide to find locally stocked colors)

PRODUCT SPECIFICATIONS

RIVERCREST® WALL

Unilock's most natural, versatile and easy-to-use wall system. The unique engineered S-shape and patent pending-design creates vertical and lateral interlock for added strength, making it ideal for retaining walls up to 1.8m (6.0') when combined with geogrid reinforcement.

PILLAR UNIT

PISA 2[®]/CONCORD WALL™

The built-in setback design of Pisa2/Concord Wall automatically forms the correct slope, ensuring a highly stable retaining wall. Utilizing the tapered components, you can form curved walls and steps. Gravity walls up to 3.5 ft (1m) and grid reinforced walls up to 25 ft (7.5m) high under typical conditions.

ROMAN PISA®/ROMAN WALL®

RomanPisa boasts a distressed appearance that gives the impression that it has been around for decades. Admired for versatility and style, RomanPisa can be used to form straight or curved walls, as well as planters and steps. Gravity walls up to 3.5 ft (1m) and grid reinforced walls up to 25 ft (7.5m) high under typical conditions.

SIENASTONE®

This big, bold stone is impressive as a wall or as treads in large outdoor staircases. SienaStone's long lines and split face appearance make it an attractive alternative for heavier load bearing applications. Gravity walls up to 10 ft (3m) or grid reinforced up to 40 ft (12m) under typical conditions.

Refer to Product Data Resource Guide for unit measurements. SienaStone also available in: Corner 90 Right & Left, Corner 45 Right & Left, Closed End Coping. For detailed product information and local color availability contact your Unilock Representative. ** Available only in Closed End Coping in most markets.

DURAHOLD®

The large size of DuraHold (1680lbs./762kg.) makes it an appropriate choice for demanding structures up to 40ft. (12.2m). Proper engineering and a good selection of components make this an exceptional wall system for gravity, tie-back or grid reinforced walls. A great alternative to “poured in place” concrete. Gravity walls up to 6 ft (1.8 m) in typical conditions.

For detailed product information and local color availability contact your Unilock Representative.

DURAHOLD2®

DuraHold2 is similar to DuraHold in appearance, but is almost half the size, (820lbs./363kg.), making it economical for low walls. Concrete tiebacks or Geogrid reinforcement expands the various engineering options, allowing for structures up to 25 ft. (7.62m) high. Gravity walls up to 4 ft (1.2 m) in typical conditions.

For detailed product information and local color availability contact your Unilock Representative.

UNILOCK PROJECT SUPPORT

Take advantage of our years of industry-leading expertise and unparalleled personal attention and collaboration, to ensure every intricate detail of your project runs smoothly. Our level of support is tailored to meet your needs, including:

- | Product customization
- | Budget pricing
- | Providing specifications, cross sections and details
- | Lunch and Learn continuing education credits
- | Samples
- | Outdoor Idea Centers

CUSTOM OPTIONS

Every project is unique. We have the expertise, technology and capabilities to create just what you need. Talk to your local representative about combining the many shapes, finishes and colors offered by Unilock to create the ideal product for your project.

UVISION® AND SAMPLES

Choosing the perfect product has never been easier. Our Uvision design software conveys your design in a rendering to aid your client with visualization. And when the time comes to finalize your product selection, your Unilock Representative will bring you all the real life samples you need.

OUTDOOR IDEA CENTERS

Unilock's Outdoor Idea Centers provide you with the perfect places for inspiration and great destinations for client feedback. When you visit be sure to see, touch and experience all that Unilock has to offer and ask our knowledgeable team any questions you have.

LUNCH AND LEARN

At Unilock, there is always something new. Ask your Unilock Representative about a Lunch and Learn session that also earns you valuable continuing education credits.

We're here to help through every step of your project. Talk to your Unilock Representative today to get all the details.
