| Signal word                                | : Danger  |   |
| Hazard statements                          |   | se an allergic skin reaction.<br>nage the unborn child.   |
| Precautionary statements                   |   |   |
| General                                    |   | el before use.<br>t of reach of children.<br>al advice is needed, have product container or label at hand.  |
| Prevention                                 | P202 - Do not h<br>P280 - Wear pro<br>apron Wear ey<br>P261 - Avoid bro | becial instructions before use.<br>andle until all safety precautions have been read and understood.<br>otective gloves. Wear protective clothing: Recommended: Synthetic<br>e or face protection: Recommended: Splash goggles<br>eathing vapor.<br>nated work clothing should not be allowed out of the workplace. |

#### Date of issue/Date of revision

# Section 2. Hazard identification

| Response                       | <ul> <li>▶308 + P313 - IF exposed or concerned: Get medical attention.</li> <li>P302 + P352 + P362+P364 - IF ON SKIN: Wash with plenty of soap and water.</li> <li>Take off contaminated clothing and wash it before reuse.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical attention.</li> </ul>           |
|--------------------------------|---|
| Storage                        | : P405 - Store locked up.   |
| Disposal                       | <ul> <li>P501 - Dispose of contents and container in accordance with all local, regional,<br/>national and international regulations.</li> </ul>  |
| Supplemental label<br>elements | <ul> <li>Percentage of the mixture consisting of ingredient(s) of unknown acute oral toxicity: 21.3%</li> <li>Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 21.3%</li> <li>Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation toxicity: 21.3%</li> </ul> |

### Section 3. Composition/information on ingredients

| Substance/mixture             | : Mixture        |
|-------------------------------|------------------|
| Other means of identification | : Not available. |

| Ingredient name  | % (w/w) | CAS number            |
|--|---------|-----------------------|
| M-methyl-2-pyrrolidone<br>2,2',2"-(hexahydro-1,3,5-triazine-1,3,5-triyl)triethanol | - ()    | 872-50-4<br>4719-04-4 |

(1) The actual concentration or actual concentration range is withheld as a trade secret.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First-aid measures

|--|

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If<br>unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband.   |
| Skin contact | : Wash with plenty of soap and water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the<br>event of any complaints or symptoms, avoid further exposure. Wash clothing<br>before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion    | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air<br>and keep at rest in a position comfortable for breathing. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention. Never give anything by mouth to an unconscious person. If unconscious, |

2/11

### Section 4. First-aid measures

place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects |  |
|--------------------------------|--|
| Eye contact                    | : No known significant effects or critical hazards.  |
| Inhalation                     | : No known significant effects or critical hazards.  |
| Skin contact                   | : May cause an allergic skin reaction.   |
| Ingestion                      | : No known significant effects or critical hazards.  |
| Over-exposure signs/sympto     | <u>ms</u>  |
| Eye contact                    | : No specific data.  |
| Inhalation                     | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations                          |
| Skin contact                   | : Adverse symptoms may include the following:<br>irritation<br>redness<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |
| Ingestion                      | Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations                            |
| Indication of immediate medic  | al attention and special treatment needed, if necessary  |

| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
|----------------------------|---|
| Specific treatments        | : No specific treatment.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| : Use an extinguishing agent suitable for the surrounding fire.                                    |
|--|
| : Do not use water jet.  |
| : In a fire or if heated, a pressure increase will occur and the container may burst.              |
| : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide |
|  |

Date of issue/Date of revision

### Section 5. Fire-fighting measures

| Special protective actions<br>for fire-fighters   | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
|---|---|---|
| Special protective<br>equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                         |

### Section 6. Accidental release measures

| Personal precautions, protect  | <u>tiv</u> | e equipment and emergency procedures  |
|--------------------------------|------------|---|
| For non-emergency<br>personnel | :          | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.  |
| For emergency responders       | :          | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :          | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | nt         | ainment and cleaning up   |
| Small spill                    | :          | Stop leak if without risk. Move containers from spill area. Dilute with water and mop<br>up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry<br>material and place in an appropriate waste disposal container. Dispose of via a<br>licensed waste disposal contractor.  |
| Large spill                    | :          | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 12 for waste |

### Section 7. Handling and storage

### Precautions for safe handling

Protective measures
 i Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

13 for waste disposal.

4/11

# Section 7. Handling and storage

|  |   | 5  |
|--|---|--|
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Do not store below the following temperature: 15°C (59°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                  |   | Exposure limits   |  |  |
|----------------------------------|---|---|--|--|
| M-methyl-2-pyrrolidone           |   | CA Ontario Provincial (Canada, 1/2018).<br>TWA: 400 mg/m <sup>3</sup> 8 hours.  |  |  |
| Appropriate engineering controls | local exhaust ventilation or  | e dust, fumes, gas, vapor or mist, use process enclosures,<br>r other engineering controls to keep worker exposure to<br>ow any recommended or statutory limits.  |  |  |
| Environmental exposure controls  | they comply with the requin<br>cases, fume scrubbers, filt  | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |  |  |
| Individual protection meas       | <u>ures</u>   |   |  |  |
| Hygiene measures                 | eating, smoking and using<br>Appropriate techniques sh<br>Contaminated work clothir   | d face thoroughly after handling chemical products, before<br>the lavatory and at the end of the working period.<br>ould be used to remove potentially contaminated clothing.<br>In should not be allowed out of the workplace. Wash<br>pore reusing. Ensure that eyewash stations and safety<br>workstation location.  |  |  |
| Eye/face protection              | assessment indicates this gases or dusts. If contact unless the assessment inc  | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. Recommended: Splash goggles.                                  |  |  |
| Skin protection                  |   |   |  |  |
| Hand protection                  | be worn at all times when<br>this is necessary. Conside<br>check during use that the<br>should be noted that the tin<br>different for different glove | vious gloves complying with an approved standard should<br>handling chemical products if a risk assessment indicates<br>ering the parameters specified by the glove manufacturer,<br>gloves are still retaining their protective properties. It<br>me to breakthrough for any glove material may be<br>manufacturers. In the case of mixtures, consisting of<br>rotection time of the gloves cannot be accurately |  |  |

5/11

### Section 8. Exposure controls/personal protection

| -                      | · · ·  |
|------------------------|--|
| Body protection        | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product. Recommended: Synthetic apron.</li> </ul>                      |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>                              |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. |
|                        |  |

# Section 9. Physical and chemical properties

# Section 11. Toxicological information

### Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

Not available.

| Information on the likely<br>routes of exposure | : | Routes of entry anticipated: Oral, Dermal, Inhalation. |
|---|---|--|
| Potential acute health effects                  |   |  |
| Eye contact                                     | 1 | No known significant effects or critical hazards.      |
| Inhalation                                      | : | No known significant effects or critical hazards.      |

**Skin contact** : May cause an allergic skin reaction.

Ingestion : No known significant effects or critical hazards.

| Symptoms related to the | physical, chemical and toxic | ological characteristics |
|-------------------------|------------------------------|--------------------------|
|                         |                              |                          |

| Eye contact  | : No specific data.  |
|--------------|--|
| Inhalation   | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations                          |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |
| Ingestion    | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations                          |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| Short term exposure            |  |                |  |  |  |
|--------------------------------|--|----------------|--|--|--|
| Potential immediate<br>effects | : Not available.   |                |  |  |  |
| Potential delayed effects      | : Not available.   |                |  |  |  |
| <u>Long term exposure</u>      |  |                |  |  |  |
| Potential immediate<br>effects | : Not available.   | available.     |  |  |  |
| Potential delayed effects      | : Not available.   | lot available. |  |  |  |
| Potential chronic health eff   | <u>:ts</u>   |                |  |  |  |
| <b>Conclusion/Summary</b>      | : Not available.   |                |  |  |  |
| General                        | nce sensitized, a severe allergic reaction may occur when subsequently exposed overy low levels. |                |  |  |  |
| Carcinogenicity                | o known significant effects or critical hazards.   |                |  |  |  |
| Mutagenicity                   | o known significant effects or critical hazards.   |                |  |  |  |
| Teratogenicity                 | lay damage the unborn child.   |                |  |  |  |
| Developmental effects          | No known significant effects or critical hazards.  |                |  |  |  |
| Fertility effects              | : No known significant effects or critical hazards.  |                |  |  |  |
| Date of issue/Date of revision | : 02/05/2019 Date of previous issue : 30/04/2018 Version : 2 8                                   | 3/11           |  |  |  |

## Section 12. Ecological information

Other adverse effects

: No known significant effects or critical hazards.

# Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information
